Allowable Subject Matter

Applicant's arguments in conjunction with amendments, see page 11 of remarks, filed 9/15/2006, with respect to newly amended claims 1 and 4 – 22 have been fully considered and are persuasive.

The following is an examiner's statement of additional reasons for allowance: the prior art on the record, Taninaka teaches certain aspects of the current application, involving an apparatus for supporting a configuration of a storage system with first and second information acquisition units.

However the prior art fails to teach or suggest alone or in combination the limitations of an allocation unit which allocates temporary port information and an inquiry unit which inquires port information of respective ports provided in an upper level device and an input/output device provided in an actually configured storage system. Prior art is further silent on motivation to combine such features and functionality and is therefore deemed allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statements of Reasons for Allowance."
